GOLDEN DEER COIN (GDC)

INTRODUCTION

Gold has been and continues to be a premiere de facto world currency and safe-haven asset. However, owning physical gold in large amounts imposes several inherent drawbacks. It must be stored securely -- yet be accessible for trade and payments. It must be transported, yet this is costly and vulnerable. The standard solution, gold exchange traded funds (ETFs) or gold futures, incur brokerage fees or reliance on exchanges that may be compromised or non-operational during times of severe market stress. Now there is a better way to avoid the problems associated with possessing physical gold while keeping the benefits of gold ownership through **GDC Tokenized Gold ownership**.
